

QUESTION 1

- Write a program to take an 8-bit binary number as input into register BL.
- Print the content of the 8-bit register as an ASCII (do not print bit by bit)

QUESTION 2

- Write a program to extend question 1.
- Print the content of the register bit by bit to produce a binary output in the terminal.

QUESTION 3

- Write a program to take a 2-digit hexadecimal number as input into register BL
- Print the content of the 8-bit register as an ASCII.

QUESTION 4

- Write a program to extend question 3.
- Print the content of the register 1 hex digit at a time.
